

CLASSIC

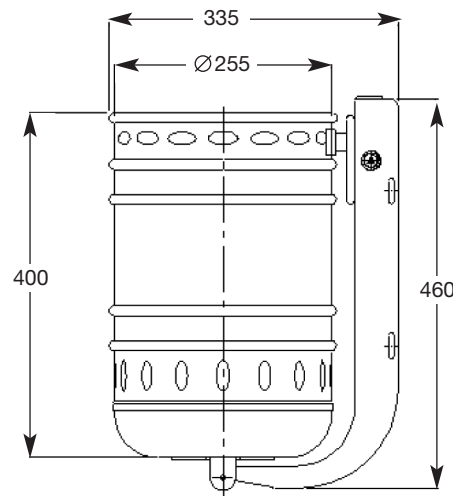

Contentur litter bins come in a wide variety of designs, they are made from polyethylene, steel or cast aluminium. They are readily adaptable to any urban environment such as historical settings, gardens and walkways, business districts and shopping centres.

Contentur designs and manufactures its litter bins to procedures based on ISO 9001, and the Environmental

Management System also has ISO 14001 Quality Management certification.

The Contentur Group guarantees the quality of all its products, and on request can also offer a complete product maintenance programme. For more information, please contact our Technical Sales network.

BASKET HEIGHT	400-445 mm	RECOMMENDED installation height	865-865 mm
MAXIMUM WIDTH	355-390 mm		

GENERAL SPECIFICATIONS

■ The Classic litter bin is a version of our Goya model, designed for use in historical sites, pathways, gardens, parks etc.

■ The 20 or 30 litre capacity basket is made from 1.2 mm thick steel plate, in Ironoxide grey, with an upper reinforcing rim and locking bolt. It is easy to remove for handling and emptying by maintenance staff.

■ Fixing mount made from 3.0 mm thick I.H.A. F112 steel plate, fitted with a side access lock that does not obstruct tipping of the basket. The system permits easy installation on lampposts, posts, etc.

■ The fixing mount system is carefully designed for easy switching between different capacity baskets.

■ All parts have been corrosion-treated by cataphoresis, which means the unit will have high resistance to extreme weather conditions plus it will not suffer from rust points.

■ The Classic litter bin has a special powdered polyester finish, applied by robot and finished with automatic oven-hardening.
