### FEATURES

Body, base and upper rim manufactured from cast sand-blasted aluminium, painted Ironoxide grey. All metal parts are made of stainless steel or cast aluminium to prevent corrosion.

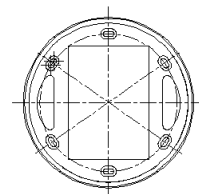

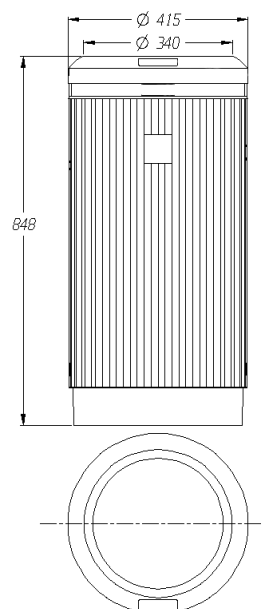

They are designed with vertical fluting that reinforces the whole assembly providing originality and elegance. This fluting makes it difficult to stick posters and labels to the body of the bin.

The open-top filling area consists of a ring integral with the body to prevent the removal of the basket via the top.

The circular 80 litre body into which the litter is deposited houses the door for emptying. A locking system with a standard triangular key is provided to prevent unauthorised access.

Can be customised by means of a badge affixed to the body, maximum size 120 x 120 mm.

### EQUIPMENT

Integral cigarette stubber in the body; ashtray can be supplied on request.

65 l basket has a reinforced ring in the upper part and is fitted with an integral handle to make emptying easier for maintenance staff.

There is the option of replacing the basket with a refuse sack. The system can also be used to segregate two separate materials if a two-compartment basket is fitted.

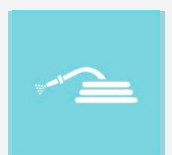

Vandal-resistant support frame is integrated into the body and is fixed to the pavement simply and securely by means of six 12mm universal expansion.
